

“The enormity of their compassion is unbelievable. It’s like they’ve been in your shoes.”

- Priscilla McBrayer,
a patient at
The Mammography Place

Comfort and care you can trust with every visit.

When her routine mammogram revealed an abnormality and she had to undergo a diagnostic mammogram, Priscilla McBrayer was anxious for results. She felt relief when a personal phone call came from Sharon Elliott, director of The Mammography Place, to tell her everything was normal.

“The enormity of their compassion is unbelievable,” Priscilla says. “It’s like they’ve been in your shoes.”

The professional and confident care given by the staff at The Mammography Place is why Priscilla has chosen to get her mammograms there every year. “They know about you and ask about what’s going on in your life. I’ve always told anyone that this is a great place to have your mammogram done.”

The Mammography Place and its technologists are fully accredited and certified by the American College of Radiology to provide the highest quality screening mammography services to the women of Rutherford County and the surrounding area.
