

**Wanda Young**  
Rutherford Surgical Associates patient

## We can help you enjoy your favorite foods again.

Eating her favorite foods — Italian and Chinese — had become no longer enjoyable for Wanda Young of Sunshine. The acid reflux she'd battled for four years made most every food she ate cause burning and pain in her throat. Medications, she says, were ineffective. "I was to the point I really couldn't eat a whole lot."

In November Young had the Transoral Incisionless Fundoplication (TIF) Procedure performed by Dr. Gregg Drabek at Rutherford Surgical Associates. She's back to enjoying her favorite foods, including hot wings. "It's the best surgery I've ever had. I'm no longer on medication. I'm glad to be back to normal."

The general surgeons at Rutherford Surgical Associates provide a full range of consulting, diagnostic and treatment services — including abdominal, laparoscopic, oncologic, endoscopic and endocrine surgery. Many procedures can be performed on an outpatient basis.
